”Ålö AB purchases the Front Loaders and Implements business areas from Vreten AB”

Ålö AB, one of the world's leading suppliers within the agricultural machinery industry, announce they are going to purchase the following business areas from Vreten AB: front loaders and implements for front loaders and wheel loaders.

- "Vreten is well-established within the sector of agriculture on the Swedish market and is renowned for its quality and long tradition of manufacturing front loaders and implements. This acquisition is in keeping with our strategy of increasing our range of products as regards implements for both front loaders and wheel loaders. We can also see the potential of future collaboration with Vreten, both in Sweden and abroad," says Niklas Åström, Sales and Market Manager at Ålö AB.
- "This business deal will enable us to develop our use of Vreten within our business areas - forestry trailers, cranes, trailers, road graders, recycling and construction," says Christian Yström, Sales & Market manager at Vreten AB.

Vreten AB will continue to supply its customers with spare parts for previously sold front loaders.

The business transaction will take place during the autumn and is estimated to be fully implemented by the end of the year.
